# THE COMPANY

Founded in 2010, our company has grown to a multinational level producing the highest quality tobacco products that include tobacco processing, wide range of cigarette format production, shisha tobacco and shisha related product manufacturing.

We are committed to the highest standards of company conduct, from how we source our tobacco leaf and raw materials, right through to how we market our products to adult smokers.

With our brands being sold across the globe, we take pride in the sustainable and responsible way we run our business, and the recognition we've received, which reflects on the continuous growth we see year by year.

**United Arab Emirates**

# QUALITY

We have quality control labs and a highly qualified quality control team, with state of the art laboratory machines in every factory, to ensure product quality throughout the production process. Every batch of cigarettes is checked, and if one does not meet our strict standards, it is discarded.

To ensure sustainability of quality, all tobacco and finished goods' stores are temperature controlled. This maintains the correct level of humidity and temperature to ensure freshness and a premium taste in all our products.

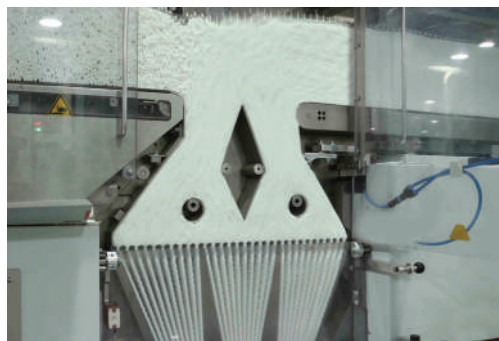

## TRIPLE QUALITY STANDARD

- Tobacco blend is checked in 3 different stages before production.
- Product materials are checked for defects in 3 different stages before and during production.
- Finished goods are checked by online sensors, lab tests, and manually before delivery.

# MAC

THE CONTEMPORARY AUTHENTIC

MAC uses the expertise of our blending heritage to craft this unique recipe. Its the personal touch of our Swiss Master Blender and the extra-fine cut that distinguishes the taste of sheer smoothness.
